ABOUT ME

Results-driven Software Developer and AWS Certified AI Practitioner with a strong computer science background building scalable systems and agentic ML solutions. Proven ability to thrive in ambiguous, fast-moving environments, integrating AI-powered developer tooling (GitHub Copilot, Cursor) and LLM orchestration frameworks into the SDLC. Expert at translating complex research into production-ready code with a track record of high-impact leadership and cloud-native architecture.

EDUCATION

- Master's in Applied Computer Science (MApCompSc), Computer Science, Concordia University, Canada **Sep 2024 – Present**
- Chartered Financial Analyst (CFA) Level I Candidate **Dec 2023**
- Bachelor of Technology (B.Tech.) in Computer Science Engineering, GGS Indraprastha University, India **Aug 2019 – Jun 2023**
8.9/10 CGPA

RESEARCH PAPERS

- Enhancing Healthcare Diagnostics with SVM-Based Machine Learning for Diabetes Prediction [Springer 2025] | [Link](#)
- A Real-Time Crowd Tracking and Control System Using Deep Learning [Springer 2024] | [Link](#)
- Malicious DNS Detection and Prediction Using SMOTE-ENN and Hybrid Artificial Neural Network [IEEE Xplore 2022] | [Link](#)
- Image Captioning- A Deep Learning Approach [IJRASET 2022] | [Link](#)
- Secure One-Time Password Generation using Shamir's Secret Sharing [IJFMR 2023] | [Link](#)
- An Ensemble Approach to Chronic Kidney Disease's Diagnosis [IJRASET 2023] | [Link](#)
- A Deep Learning Approach to Job Recommendation Analysis with NLP [IJISRT 2023] | [Link](#)

WORK EXPERIENCE

Flexspring, Software Development Engineer Intern

Jan 2026 – Present

- Collaborate with cross-functional teams to design and deploy scalable web applications using Spring Boot and React, while contributing to the integration of AI-powered developer tooling and agentic CLI workflows.
- Build RESTful APIs, implement robust Java microservices, and optimize modern React interfaces to enhance scalability, maintainability, and overall development workflows.

Amazon, Software Development Engineer Intern

May 2025 – July 2025

- Designed and deployed an AI agent using Amazon Bedrock LLM for automated dataset generation, enabling non-technical users to create mission-specific datasets through natural language prompts
- Built scalable cloud architecture with AWS CDK, Integrating S3 storage, OpenSearch Serverless, and Bedrock Knowledge Base with Amazon Titan embeddings for semantic search capabilities

ICICI Lombard, Software Development Engineer

Feb 2024 – Sept 2024

- Boosted customer behavior insights by 40% using advanced ML models for data interpretation.
- Reduced bounce rate by optimizing user engagement and retention through ML models.

Tata Consultancy Services, System Engineer

Feb 2023- Jan 2024

- Wrote SQL queries, performed data cleaning, and utilized Power BI for business visualization.
- Worked on a project of areas of GRC (Governance, Risk Management, and Compliance) application development.

Coding Ninjas, Data Science Teaching Assistant

Oct 2021 – Feb 2022

- Conducted several doubt resolving sessions and debugging codes.
- Helped students in their assignments and various projects. Designed new and fine-tuned the course material.

Board Easy, Python Developer

Sep 2021 – Oct 2021

- Product owner of an onboarding which increased the users reaching AHA moments in the first 30 days by 115%.
- Designed in app user journey campaigns within the first 30 days of onboarding which increased activation by 22%.

CERTIFICATIONS

- AWS Certified AI Practitioner | [Link](#)
- AWS Certified Cloud Practitioner | [Link](#)
- Data Structures in C++, Coding Ninjas | [Link](#)
- Google LLM Certifications (All 7 Completed) | [Link](#)
- Machine Learning Course, Coding Ninjas | [Link](#)
- Machine Learning Masters Course, Coding Blocks | [Link](#)
- Web Development Course, Internshala | [Link](#)

SKILLS

- Software Engineering: System Design, Data Structures & Algorithms, Unit Testing, Debugging, Code Review.
- AI-Powered Development: GitHub Copilot, Cursor, Claude Code, OpenAI Codex/ChatGPT, AI-native CLI workflows.
- Agentic AI & LLMs: LangChain, LlamaIndex, AutoGen; RAG, Tool/Function Calling, Prompt Engineering, Multi-step Reasoning.
- Languages & Frameworks: C++, Java (Spring Boot), Python, C#, SQL, JavaScript (Node.js, React).
- Cloud & DevOps: AWS (S3, CDK, Bedrock, SageMaker, EC2), Docker, CI/CD (Jenkins, GitHub Actions), Infrastructure as Code.
- Machine Learning: Scikit-learn, TensorFlow, Keras, Hyperparameter Tuning, Neural Networks (CNN, RNN, LSTM).
- Data Analytics: Power BI, Tableau, Advanced SQL, Pandas, NumPy, Statistical Modeling, A/B Testing Analysis.

LEADERSHIP ROLES

- Entrepreneurship and Development Cell, BVCOE | Chairperson **Jul 2021-Jul 2022**
- Entrepreneurship and Development Cell, BVCOE | Social Media and Publicity Head **Jun 2020-Jul 2021**
- TEDxBVCOE | Head of Sponsorship **Feb 2022-Sep 2022**
- TEDxBVCOE | Head of Technical Department **Jun 2021-Feb 2022**
